Our history, our future
Looking back provides the path forward.

George Santayana—a philosopher, essayist, poet and novelist—once said, “Those who do not remember the past are condemned to repeat it.” Yet sometimes remembering our history with the goal of repeating it can actually be a good thing. As the nation’s 30,000 cooperatives celebrate National Co-op Month this October, it is a great time to take a look back—and a look forward.

Take the history of your electric co-op. Northwestern Electric was founded in 1940 when neighbors worked together to bring electricity to our rural communities. Big investor-owned power companies thought they couldn’t generate enough profit so they bypassed rural areas. Back then, there were frequent meetings among neighbors to discuss the formation of the cooperative. Once established, annual meetings were the “must attend” event of the year. The co-op—on behalf of the member-owners—committed to provide the community with electricity.

Fast forward to today—and tomorrow. Northwestern Electric currently serves 5,947 members. We have returned $12,673,500 in capital credits to our members since the Cooperative first started paying them in 1965.

We understand the spirit that helped create this co-op must be continually nurtured. While times and technology will continue to change, our commitment to you will not.

Although we started out to provide electricity, our impact in the community (with your support) has grown. Our gross receipts tax helps support the schools in our area. We support local charities and organizations. We’re a major contributor to the economic base of northwest Oklahoma.

As we continue to look toward the future, you can be confident that Northwestern Electric will commit to explore new ways to help our members and our community. We recently added a community solar farm and upgraded to the new smart meter technology. (16407001)

Over the years, as we’ve listened to you and your fellow member-owners, we know we have to keep pace as technology and consumer tastes evolve. As always, we welcome your participation as we plan for the future.

CO-OP STATS

Fall/Winter Energy Tip: When you are asleep or out of the house, turn your thermostat back 10° to 15° for eight hours and save around 10 percent a year on your heating and cooling bills. A programmable thermostat can make it easy to set back your temperature – set it and forget it!

If you recognize your account number, all you have to do is give us a call on or before the 8th of the current month and we’ll give you a credit on your bill for the amount stated.

This month’s numbers are worth $25 each. Happy hunting!
